Four Areas

- Assessment
- Evaluation & Compensation
- Professional Development
- Capacity-Building
Assessment

- Value-added analysis
- Common metric
- Much improved end-of-the-year *summative* exam that measures higher-order thinking skills
- Integrated *formative* testing regime over school year that provides teachers at 4-6 week intervals with pedagogical interventions to increase student achievement
Evaluation & Compensation

Evaluation

- A system that for the first time considers student learning results – *outputs* – along with multiple *input* measures through an improved observation process
  - Value-added progress
  - Charlotte Danielson framework
Observation protocols in four domains:

- Planning and preparation
- Classroom environment
- Instruction
- Professional responsibilities
Peer Review

- All observations in these domains are conducted by expert peers
Value-Added: Three Instructional Results

Highly effective: Above

Effective: No Detectable Difference (NDD)

Ineffective: Below

(Using a 3-year running average)
Compensation

- Career ladders that allow educators to advance based on their knowledge and skills and on the learning gains of their students
  - Stages for apprentice, career, advanced and distinguished teachers
  - Not merit pay

Professional Development

- Mentoring for new teachers
- Teacher coaches
- Significant increase in number of professional development days to help all teachers and administrators master new skills
Capacity-Building

- Provide technical assistance teams for schools and school districts that are not succeeding
- Address the problem of “perverse incentives”
- Strengthen regionally available assistance (e.g., BOCES in NY and IUs in PA) to provide professional development
- Mandate a Department of Education that can monitor local progress and intervene where necessary
Establish Academic Achievement and Accountability Commission

- Independent
- Empirical evaluation of all components
- Monitor progress
- Recommend changes
